

ATC2026

AMERICAN TRANSPLANT CONGRESS

BOSTON, MA • JUNE 20-24

ATC 2026 Call for Invited Programs Keyword List

Adhesion molecules

Adverse effects

African-American

Age factors

Alcohol

Alloantibodies

Alloantigens

Allocation

Allorecognition

Angiography

Antibodies

Anticoagulation

Antigen presentation

Antilymphocyte antibodies

Apoptosis

Arteriosclerosis

Autoimmunity

B cells

Bacterial infection

Bile duct

Bioengineering

Biopsy

Bone

Bone marrow

Bone marrow transplantation

Brain death

Cadaveric organs

Calcineurin

CD4

Co-stimulation

COVID-19

Cytomegalovirus

Donors

Donors

Donors

Dosage

Drug interaction

Economics

Efficacy

Elderly patients

Employment

Endothelial cells

Epithelial cells	Hepatitis C
Epitopes	Hepatocellular carcinoma
FACS analysis	Hepatocytes
Fibrosis	Highly-sensitized
FK506	High-risk
Fungal infection	Hispanic
Gene expression	Histocompatibility
Gene polymorphism	Histocompatibility antigens
Genomic markers	Histology
Genomics	HIV virus
Glomerular filtration rate (GFR)	HLA antibodies
Glomerulonephritis	HLA antigens
Graft acceptance	HLA matching
Graft failure	Hyperglycemia
Graft function	Hypertension
Graft survival	IgG
Graft-infiltrating lymphocytes	Image analysis
Graft-versus-host-disease	Immunogenicity
Heart	Immunoglobulins (Ig)
Heart failure	Immunosuppression
Heart preservation	Indirect pathway
Heart transplant patients	Induction therapy
Heart/lung transplantation	Infection
Hemodynamics	Inflammation
Hepatitis	Insulin
Hepatitis B	Interleukin-2 receptor

Intestinal transplantation

Ischemia

Islets

Kidney

Kidney transplantation

Kidney/liver transplantation

Kidney/pancreas transplantation

Laparoscopy

Length of stay

Liver

Liver cirrhosis

Liver failure

Liver grafts

Liver preservation

Liver transplantation

Living-related liver donors

Lung

Lung infection

Lung transplantation

Lymph node

Lymphocytes

Machine preservation

Malignancy

Medicare

Metabolic complications

Metabolic disease

Methodology

Mice

Mice

Mixed chimerism

Monitoring

Monoclonal antibodies

Morbidity

Mortality

Multicenter studies

Multivariate analysis

Multivisceral transplantation

Mycophenolate mofetil

Natural killer cells

Nephrectomy

Nephropathy

Neutropenia

Neutrophils

Non-invasive diagnosis

Obesity

Outcome

Outpatients

Oxidant stress

Pain

Pancreas

Pancreas transplantation

Patient education

Pediatric	Renal function
Perfusion solutions	Renal injury
Pharmacokinetics	Renal ischemia
Pig	Resource utilization
Pneumonia	Retransplantation
Polyma virus	Risk factors
Polymerase chain reaction (PCR)	Safety
Post-operative complications	Screening
Post-transplant diabetes	Sensitization
Post-transplant malignancy	Sirolimus (SLR)
Prediction models	Skin transplantation
Pregnancy	Stem cells
Preservation	Surgical complications
Primates	Survival
Procurement	T cell activation
Prognosis	T cell clones
Prophylaxis	T cell graft infiltration
Proteinuria	T cell reactivity
Psychosocial	T cell receptors (TcR)
Public policy	T cells
Rat	T helper cells
Recurrence	Tolerance
Reinfection	Toxicity
Rejection	Transcription factors
Renal dysfunction	Vaccination
Renal failure	Vascular disease

Ventricular assist devices

Viral therapy

Waiting lists

Warm ischemia

Weight

Xenoreactive antibodies
